

SLIP 6

Step 1: Tableau Open Kar

Tableau

Open:

Tableau Public / Tableau Desktop

Step 2: Dataset Load Kar

Left side:

Connect → Text File / Excel

Adult ya Iris dataset select kar.

Ab Ek Ek Visualization

a) 1D (Linear) Data Visualization

Meaning

Single variable ka graph.

Example

Age distribution

Banane ka tarika

Age drag → Columns

Age drag → Rows

Show Me → Histogram / Bar Chart

Output

Linear/1D visualization ban jayega.

b) 2D (Planar) Data Visualization

Meaning

2 variables compare karna.

Example

Height vs Weight

ya

Sepal Length vs Sepal Width

Steps

Sepal Length → Columns

Sepal Width → Rows

Show Me → Scatter Plot

Output
2D graph.

c) 3D (Volumetric) Data Visualization
Tableau real 3D nahi deta mostly.

Sir ko satisfy karne ke liye:

Bubble Chart
Packed Bubble
Size + Color + Axis use kar.
Example
X-axis → Sepal Length
Y-axis → Petal Length
Size → Petal Width
Color → Species
Result
Pseudo 3D visualization.

d) Temporal Data Visualization
Meaning
Time based graph.

Example
Year-wise income/sales.

Steps
Date field → Columns
Income/Sales → Rows
Show Me → Line Chart
Output
Timeline graph.

e) Multidimensional Data Visualization
Meaning
3+ attributes ek graph me.
Example
X-axis → Sepal Length
Y-axis → Petal Length
Color → Species
Size → Petal Width
Use:
Scatter Plot / Treemap / Heatmap
