

SLIP 9

Step 1: Dataset Load Kar

Connect → Text File / Excel

Dataset select kar.

a) Temporal Data Visualization

Meaning

Time-based data visualization.

Best Chart

Line Chart

Example

Year-wise income/sales.

Steps

- Date field → Columns
- Sales/Income → Rows
- Show Me → Line Chart

Output

Timeline graph.

b) Multidimensional Data Visualization

Meaning

3 ya usse jyada attributes ek graph me.

Example

Iris dataset:

- X-axis → Sepal Length
- Y-axis → Petal Length
- Color → Species
- Size → Petal Width

Best Chart

Scatter Plot

Steps

1. Sepal Length → Columns
 2. Petal Length → Rows
 3. Species → Color
 4. Petal Width → Size
-

c) Tree / Hierarchical Data Visualization

Meaning

Parent-child relationship show karna.

Best Chart

Treemap

Example

Occupation → Income Category

Steps

1. Category field select karo
2. Show Me → Treemap

Ya:

- Occupation → Label
- Income → Size

Output

Tree-like hierarchical boxes.

d) Network Data Visualization

Meaning

Connections/relationships between entities.

Tableau me exact network graph tough hota hai, so practical me:

- Packed Bubble
- Relationship graph
- Sankey style

use karte hai.

Example

Education ↔ Occupation

Steps

1. Source field
2. Target field
3. Use line/bubble chart

Sir mostly concept dekhte hai.
